

## Exercises 01 -Lyrics

Fill in the missing gaps to complete the lyrics based on your Client/Server model knowledge.

To get a \_\_\_\_\_, you need to ask.  
That's called a \_\_\_\_\_ and asking is the task.  
The \_\_\_\_\_ does send it to a web server.  
and it's really not a big failure.

A user asks for some needed infos.  
The \_\_\_\_\_ has it on its storage silos  
The user works at the \_\_\_\_\_ computer.  
\_\_\_\_\_ the info's makes him cuter.

Transport for http goes strictly over \_\_\_\_\_.  
The \_\_\_\_\_ can be running on a raspberry pi.  
This very small piece of modern electronics  
Brings enough power for streaming your Sonics.

And even in the world of modern \_\_\_\_\_.  
The \_\_\_\_\_ is needed and shouts.
